SUMMARY

A third-year Computer Science and Design student with a passion for creative problem-solving. Eager to contribute my technical skills and innovative thinking to real-world projects. I am an enthusiastic learner and am learning technologies like Java, C++ and also currently exploring the field of Web3.

PROJECT

Artfolio Working on a project called Artfolio - A platform that aims to showcase, tokenize, and discover art as non fungible tokens (NFTs). It provides artists and creators with the ability to exhibit their artwork in a digital format.

D.E Project

Team Project

FindMucks Built a TypeScript-powered platform to support people struggling with anxiety, depression, and other mental health challenges. Designed features like 24/7 support and anonymous interaction to create a safe space where users can connect and feel heard. The project is all about making mental health resources more accessible and fostering a sense of understanding and care

Hackathon

Team Project
